Electronics Recycling Program in Transition!

Due to changes in the value of the materials, funding from electronics manufacturers, flaws in the Illinois law and demands by recyclers, all of Will County's collection sites are closing this month. The County has a new contract for service and expects the program to restart within two months with new hours of operation, location changes and some minor restrictions. Please visit the website for more detailed information. Many thanks to all host communities and participants for making Will County the leading electronic recycling County in Illinois in 2015!

TV Recycling Issue!

70% of the 4.4 million pounds of electronics recycled through the Will County programs in 2015 were CRT TVs and monitors. During March, drop-off sites for Televisions and CRT monitors will be unavailable in the area and across the State. Best Buy has ceased to accept TVs unless you purchase one or pay for home collection service ($100). Vintage Tech continues to offer home collection but raised their fee to $75. Please know that options will become available in 6 to 8 weeks.

2016 Severe Weather Preparedness Training / Health and Safety Expo

Storms can bring damage to trees, homes and much more! Each year New Lenox offers a Health and Safety Expo attended by hundreds to learn easy ways to prepare for the unexpected. Stay for a training session on how to understand the signs of severe weather. Rather than run out at the last minute to grab necessities, know how to keep non-
perishable supplies on hand. Take steps to prevent damage and reduce waste while saving money and time.

April 20 Training and Expo

Challenge your Office!

The Illinois Green Office Challenge is a program that encourages friendly competition amongst office buildings to achieve energy and water conservation and waste reduction. It aims to make Illinois more livable, sustainable, and prosperous. The Illinois Green Office Challenge aims to:

1. Reduce the consumption of energy and water, output of waste, and carbon emissions
2. Economic Benefits - Businesses that participated in the 2013 Chicago Challenge reported an average of 11% reduction in their energy usage
3. Meet Corporate Responsibility and Sustainability Goals while improving reputation and image for customers and staff
4. To have fun and receive recognition by peers and the media
