

**Sunday, July 21 @ 1:05 pm
at DuPage Medical Group Field**

Water Conservation is a GRAND SLAM!

**Come see the Joliet Slammers play and
receive an eco-giveaway upon entrance!**

**PLUS take a pledge for a chance
to win other prizes!**

Use code "water" for an \$8 ticket!

Will County and the City of Joliet have Teamed-Up: Offering you plenty of ways to score on Water Conservation!

The average person uses 100 gallons of water a day between flushing, hand washing, teeth brushing and drinking. When you enter the DuPage Medical Group Field for the game, you'll receive a **pledge card** and water saving related device designed to save you cash by reducing the water you use while delivering the water you need!

During the game on Sunday, July 21, **after turning in your "Pledge to Reduce Water Use" Entry Card**, you'll be entered to **win valuable prizes** raffled between each inning. The prizes include:

A 55 gallon Rain Barrel to collect water as it runs down the spout to be used later for your lawn and garden. One lucky family will win a rain barrel, valued at \$65! (Installation not included)

The Joliet Home Depot is providing a gift certificate for a WaterSense certified low-flow toilet. This single fixture uses more water than any other plumbing feature in a home. This retails for \$94 (Installation is not included)

The grand prize is this year's 2019 Energy Star Most Efficient Dishwasher, made by Beko in Bolingbrook. It offers superior cleaning while using a fraction of the water and energy needed by conventional dishwashers. It retails for \$599. (Installation not included)

An Outdoor Home Water Conservation Kit includes an aerator hose nozzle, rain gauge, soil moisture meter, and educational watering wheel.

This Kit includes a toilet filler, aerators for faucets and a high performing shower head that uses less water.

WATER SAVING TIPS:

When you reduce the amount of water you use, you not only save money but you reduce energy used to pump the water to your home and energy used to treat the water that goes down the drain. You also prevent the need to replenish the aquifer because you never pulled the water out of it in the first place! Reducing water use is a true GRAND SLAM!

- 1. Turn off the tap while brushing your teeth.** Water comes out of the average faucet at 2.5 gallons per minute. Don't let all that water go down the drain while you brush! Wet your brush, turn off the faucet and leave it off until it's time to rinse.
- 2. Turn off the tap while washing your hands.** Do you need the water to run while you're scrubbing your hands? Save a few gallons of water and turn the faucet off after you wet your hands until you need to rinse.
- 3. Re-use your cooking water.** Instead of dumping the "pasta" water down the drain, try draining the water into a large pot. Once it cools, you can use it to water your plants. Be sure you wait because boiling water will harm your plants.
- 4. Use the car wash.** If you feel compelled to wash your car, take it to a car wash that recycles the water, rather than washing at home with the hose.
- 5. Cut your showers short.** Older shower heads can use as much as 5 gallons of water per minute. Speed things up in the shower for some serious water savings.
- 6. Choose efficient fixtures.** Aerating your faucets, investing in a low-flow toilet, choosing efficient shower heads, and opting for a Water Sense rated dishwasher and washing machine can add up to big water savings.
